General Guideline

This page should record a summary of the information gained from the client and collateral sources that lead to the severity rating. It should be essentially the same as the information given in the "reasons" section after each dimension in the Rule 25 Assessment Tool. This form must be completed. The "reasons" sections do not need to be completed if this form accompanies each completed assessment tool. Each severity rating must be clearly documented in the client file. This form should remain in the client file.
